

# HAMZA NTWARI

## SENIOR TECHNICAL CONSULTANT

London, United Kingdom | hamzawork52@gmail.com | 07428628524

### PROFILE

SENIOR TECHNICAL CONSULTANT Senior Technical Consultant specialising in enterprise integrations and AI supported delivery systems. Eight years improving data ingestion, reducing onboarding timelines, and leading technical evaluations that secure multi year SaaS contracts. Strong at diagnosing integration bottlenecks, designing scalable workflows, and aligning engineering, product, and sales around delivery outcomes. Senior Technical Consultant, Napier Technologies, London Apr 2019 — Apr 2025 Delivered more than twenty enterprise implementations across EMEA, NALA, and APAC handling ten thousand to hundreds of thousands of transactions daily. Engineered an out of the box rule pack reducing onboarding from five months to three and enabling broader consultant coverage. Reduced ingestion failures by approximately fifteen percent through stricter validation and ingestion controls. Led technical evaluation work influencing multi year SaaS deals including Credit Suisse. Delivered partner demos for Refinitiv and supported around ten sales cycles with high win rates. Built an internal LLaMA based knowledge assistant improving retrieval accuracy and response speed. Technical Consultant, CGI Inc., Leatherhead Jun 2016 — Feb 2019 Delivered multi node and multi rack HA cluster deployments in security cleared environments for Galileo. Led onsite deployment and incident response as primary technical owner. Coordinated with European engineering hubs to maintain system readiness.

### EXPERIENCE

#### Senior Technical Consultant, Napier Technologies, London Apr 2019 — Apr 2025

Delivered more than twenty enterprise implementations across EMEA, NALA, and APAC handling ten thousand to hundreds of thousands of transactions daily.

Engineered an out of the box rule pack reducing onboarding from five months to three and enabling broader consultant coverage.

Reduced ingestion failures by approximately fifteen percent through stricter validation and ingestion controls.

Led technical evaluation work influencing multi year SaaS deals including Credit Suisse.

Delivered partner demos for Refinitiv and supported around ten sales cycles with high win rates.

Built an internal LLaMA based knowledge assistant improving retrieval accuracy and response speed.

Technical Consultant, CGI Inc., Leatherhead Jun 2016 — Feb 2019

Delivered multi node and multi rack HA cluster deployments in security cleared environments for Galileo.

Led onsite deployment and incident response as primary technical owner.

Coordinated with European engineering hubs to maintain system readiness.

### EDUCATION

#### Bachelor of Science in Computer Science Artificial Intelligence Jul 2017

University of Kent, Kent

Graduated with Upper Second Class

### SKILLS

API integration

Python automation

SQL Postgres

AI delivery tooling

Technical onboarding

Incident resolution

Cloud environments

Data pipelines

Apache NiFi

Vector search

Architecture discovery

RFD demos

Multi team coordination

### CERTIFICATES

#### Python for Data Science AI and Development, IBM Jan 2025 — May 2025

Generative AI Introduction and Applications, IBM Jan 2025 — May 2025

Cisco Cybersecurity Pathway, Cisco Feb 2024 — Jul 2025

[MISSING "CUSTOM" TRANSLATION]

PulseTrader

Low latency systems work across ingestion, caching, and event driven architecture.

Derivatives Pricing Tool

Numerical engine optimisation and caching strategies.

Projext AI

Vector search, RAG, and AI workflow automation.
